Preface

The Universe and the Laws of Physics seems to
have been specifically designed for us

By

Stephen Hawking

This book, aimed at the very best students, presents the foundations and frontiers of today's physics. It focuses on the following topics; Properties Of Matter and Sound, Surface Tension and Viscosity, Dynamics Of Rigid Bodies, Atomic physics and Nuclear physics. The aim is to cover these topics in sufficient depth such that things “make sense” to students and they can achieve an elementary working knowledge of them.
